

## Order Form for Human Cell Line Authentication

Human Cell Line Authentication profiling is performed with forensically established kits covering highly informative markers (e.g., PowerPlex® 21 Kit from Promega). The analysis includes the Amelogenin locus for gender identification.

1. Cell line authentication from genomic DNA, required amount about 100 ng.  
Price per sample: 95,- €
2. Cell line authentication from pellets (dried or frozen), including DNA extraction, required amount about 10.000 cells.  
Price per sample: 105,- €

All prices without VAT.

The profiles are compared with the relevant reference databases (ATCC, DSMZ, etc.) and you will receive a written report.

The processing time is approximately one week.

Please complete page 2 of this form, sign it and send it to:
